Timothy Devon **Morris**

Roboticist · Electrical Engineer · Applied Mathematician

33 East 600 North, Orem, Utah 84057

(775)-217-7438 | devonmorris1992@gmail.com | DevonMorris | devonmorris1992

Summary

PhD candidate at Brigham Young University in electrical engineering. Passionate about solving robot autonomy by merging classical, geometric and deep learning approaches. Specialist in estimation and control of fixed-wing and multi-rotor UAVs. Obsessed with Linux, the open-source movement, and the Vim editor. Hungry for opportunities to tackle hard problems, such as large-scale SLAM, geometric estimation, robot perception, and self-driving cars.

Work Experience

Aurora Flight Sciences

Cambridge, Massachusetts

Graduate Engineering Intern

May 2019 - Present

Magicc Lab

Provo, Utah

Research Assistant

April 2017 - Present

- Perfomed GPS-denied target handoff
- Wrote a complementary filter for fixed-wing attitude estimation
- Wrote a Monte Carlo Tree Search algorithm for multi-agent path planning

BWX Technologies

Lynchburg, Virginia

Engineering Intern

May 2014 - March 2017

- Performed ultrasonic analysis of large naval nuclear components
- Helped develop novel Full Matrix Capture scanning technique

Education

Brigham Young University

Provo, Utah

PhD in Electrical Engineering

Apr 2017 - Present

- 4.0 GPA
- Fully funded through a graduate fellowship

Brigham Young University

Provo, Utah

B.S. in Applied and Computational Mathematics

Sept 2011 - Apr 2017

- Graduated with Cum Laude honors and 3.94 GPA
- Awarded an eight semester full tuition scholarship

Skills & Technologies

Programming Languages

- Modern C++
- Python
- Matlab
- Bash

Technologies

- Git
- ROS & Gazebo
- Tensorflow
- OpenCV
- Pixhawk & Arduplane
- Linux

Concepts

- State Estimation
- Linear & Nonlinear Controller Design
- Adaptive Control
- SLAM
- Deep Neural Networks
- Autopilot Design

Coursework

Engineering

- Autonomous Systems
- Flight Dynamics and Control
- Advanced Dynamics
- Robotic Vision
- Robotics
- Digital Signal Processing

Math

- Differential Geometry
- Linear & Nonlinear System Theory
- Optimal Control
- Math of Signals and Systems
- Stochastic Processes
- Detection & Estimation theory
- Optimization

Computer Science

- Deep Learning
- Bayesian Methods in CS
- Machine Learning
